August 2008

*Staying in touch
with customers*

Welcome to our August 2008 Newsletter.

A lot of water has passed under the bridge since our last newsletter. We have been extremely busy which is great to report, with so much doom and gloom being reported in the media. We have been occupied with a number of new and very interesting projects, some of which are included in this newsletter

ISO9001
Certified

This year we have changed our ISO accreditation providers. You may have noticed the logo change on our stationery!

Our systems help to ensure that you as our customer get what you want when you want it.

INSIDE THIS ISSUE

- 1 Introduction
- 2 Pukaki Airport
- 3 Staff Photo

Pukaki Airport Twizel

We manufactured two signs and two propellers for Morgan & Pollard Ltd who were the landscape contractors for this project.

The propeller was very interesting to make.

The blades were laser cut from 12mm aluminium then rolled to give a 3D effect; using a propeller design from a World

War One vintage Bristol fighter. This pattern was chosen for its traditional design rather than using a more modern style.

Our team has a wealth of experience in our industry and all pride themselves in providing our customers with the best possible quality stainless steel & mild steel fabrications. If we can assist you in any way please contact Tony or Ryan.

We would like to thank you for your custom during the year which is the reason we have been so busy!

With the year well over half over it will not be too long before thoughts turn to summer and how you are going to enjoy longer days & warmer temperatures

If you read this far, thank you!

Andrew Shepherd
